- The Certificate was granted by DEKRA-ITS Certification Services Sp. z o.o.
- Our products are CE certified and produced in EU

Product description:

MedixPro Disposable Medical Rolls are products which function is to isolate a patient from potentially contaminated surfaces of medical couches, gynaecological chairs, paediatric tables, infant examination tables, instrument and utility tables, therapeutic massage tables, physiotherapy tables, etc. They are composed of two layers of absorbent paper, highly absorbent of bodily fluids (e.g. perspiration, saliva) and pathological fluids (e.g. exudate, vomit, pus, blood, etc.). The usage of **MedixPro** Disposable Medical Rolls improve hygienic conditions required to perform procedures as well as ensures reduced likelihood of the occurrence of periprocedural infections with the average risk of fluid contamination.

Specification	Unit of measure	data
