- The Certificate was granted by DEKRA-ITS Certification Services Sp. z o.o.
- Our products are CE certified and produced in EU

Product description:

Practical Disposable Medical Rolls are products which function is to isolate a patient from potentially contaminated surfaces of medical couches, gynaecological chairs, pediatric tables, infant examination tables, instrument and utility tables, therapeutic massage tables, physiotherapy tables, etc. They are composed of one layer of paper absorbent of bodily fluids (e.g. perspiration, saliva) and pathological fluids (e.g. exudate, vomit, pus, blood, etc.) and a layer of foil which effectively serves as mechanical barrier protecting against permeability and pathogenic microorganisms found on mattress frames or tables. The usage of **Practical** Disposable Medical Rolls improve hygienic conditions required to perform procedures as well as ensures reduced likelihood of the occurrence of periprocedural infections with the average risk of fluid contamination.

Specification	Unit of measure	data
Width	cm	70 ± 1
		60 ± 1
		50 ± 1
		38 ± 1
Colours		white, blue, green,
Number of layers		2
Weight of paper (one laye)	g/m ²	21 ± 0,10
Foil thickness	µm	13±2 µm
Surface		embossed
Perforation		<ul style="list-style-type: none"> • marked >:<every 50cm
Minimum absorbing capacity	g/m ²	90
Impermeability	g/m ²	no more than 1g/m ² after 10 min
Washout dyes		inadmissible
Material		Virgin pulp
