Potassium Sorbate	Natural preservative.	< 1 %
Trisodium Citrate	Natural salt used for pH adjustment and anti-oxidant efficacy.	< 1 %
Parfum	Fragrance.	< 1 %
Dipropylene Glycol	Solvent for the preservative system.	< 1 %

INSTRUCTION FOR USE

Heat the Swash[®] Foot Cap package in the microwave for approximately 30 seconds (800 Watt).

Test temperature before use.

Carefully open the packaging and take out the 2 Foot Caps.

Put on one Foot Cap on each foot.

Optionally place a towel between the feet and the surface on which the feet will rest to avoid getting the surface wet.

The feet with Foot Caps on can be covered with a towel to avoid a fast cooling down of the product.

Leave the product on the feet for at least 2-3 min. and max. 15 min.

You can massage each foot through the Foot Cap.

Take off the Foot Caps. Dry the feet with a towel. There is no need to rinse.

No additional lotion needed.

For single use only. Do not reheat.

Do not flush down the toilet.

Throw the empty package and the Foot Caps in the bin.

TEST RESULTS

Skin irritation test

Results show that the Swash[®] Foot Caps do not cause any irritation of the skin. There was no sign of oedema or red skin during or after the test.
