MPACK® Sterilization Packaging is a series of environmentally friendly packaging products for the sterilization of instruments by Steam, Ethylene Oxide or Formaldehyde.

MPACK® sterile barrier products are constructed of a non-coated high weight medical grade paper and a clear high-strength tear-resistant multi-layer laminate film. They are available as sized pouches or customizable reels (for over-sized and odd-shaped instruments), both in flat or gusseted version.

### Key features

- Superior microbial barrier with high weight 70g medical grade non-coated paper.
- Superior multilayer film puncture and abrasion resistance reducing the risk of pinholes.
- Green tinted see-through film allowing quick detection of pinholes or tears.

  The darker green color of the seal will allow for easy visual checking of potential defects (channels, air bubbles, wrinkles, etc.)
- Clean peel: the triple band ribbed seal is designed with optimum strength and width to prevent bursting while allowing excellent peel-ability for clean, fiber-free opening and aseptic presentation of the product.
- All prints outside the packing area to prevent possible impact on paper porosity and ink offset.
- A peel symbol indicates the correct opening direction.

Sales Unit: Dispenser/Box.
