<b>Volumen</b>	1.6 m <sup>3</sup>
<b>Nettovægt</b>	243.7 kg
<b>Bruttovægt</b>	250.9 kg

## Miljø

### Content

The fibre composition in the product is virgin and recycled

### Material

Virgin fibres and recovered paper

In the tissue process both virgin fibres and recovered paper are being used. In the process it is a matter of finding an efficient solution where both virgin fibres and recovered paper play a role. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important.

The environmental benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material.

Bleaching of fibres

Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety.

There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view .

The used functional chemicals are:

Wetstrength agent

Dry strength agent

If coloured = Dye

Fixing agents

Glue = if used

The process chemicals are:

Antipitch

Protection agent

Yankee coating

# Tork Xpress® Soft Multifold Håndklædeark

Farve: Hvid

Defoamer

Dispersing agents and surfactants

pH and charge control

Retention aids

Broke treatment chemicals

Drainage aid

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes

Fulfilment of essential requirements: Yes

Food Contact

This product fulfils the legislative requirements for Food Contact materials, confirmed by external certification performed by ISEGA. The product is safe for wiping food contact surfaces and may also come occasionally into contact with foodstuffs for a short period of time.

Environmental label = Ecolabel

This product is approved for EU ecolabel.

Date of issue 2013-09-30

Revision date

SCA Hygiene products AB, 405 03 Göteborg, SE

## Production

This product is produced at Kostheim mill, Germany.

Kostheim mill is certified according to ISO 14001 and EMAS.

## Destruction

This product is mainly used for personal hygiene and can be collected together with household waste.

The packaging can be used for material recovery or energy recovery
