

Silicone Endotracheal Tubes with Cuff

Silicone endotracheal tubes are softer and more biocompatible than PVC and rubber. Once at temperature of the trachea, the tube gets more flexible, and the inflated cuff will fit to the open space of the trachea.

Features:

- Lateral murphy eye at distal tip, minimize risk of airway tissue damage
- Radiolucent
- Connector included
- Silicone material benefits:
 - Patient comfort. Silicone is a soft material that conforms to body contours
 - Reusability. Silicone resists deterioration better than PVC
 - Transparency. Possible to see blood and mucous if they develop
 - Low pressure/high volume cuff
- Non sterile-Sterilization: Only cold sterilization
- Sizes 3 mm to 14 mm
- 1/pk

Cat. No	Name	Fr	Inner Ø mm	Outer Ø mm	Length mm	MOQ
0615A	Silicone Endotracheal Tube, 3 mm, 1/pk	14	3	4.7	160	1
