

evercare[®] Medical face mask with earloops, type II

REF: 2882, 2883

evercare[®] Medical mask with earloops, type II provides a barrier to minimize the direct transmission of infective agents between medical staff and patient. It is an allround face mask with high filtration capacity and low breathing resistance. Recommended to be used during dry surgery, with no risk of splashes. The mask is slightly shorter in width than many other face masks but at the same time it is also wider when in open size. The design of the side sealing and the anchoring of the earloops help to reduce the gaping at the cheeks and makes the mask more conforming to the face. This overall design results in a deeper cup-shape, which is better conforming and provides a fitter coverage of the nose and mouth.

Key Features
