

Sterile gauze dressings

- 100% cotton.
- 17 threads/sq.cm (approx. 23g/sq.m.), 20 threads/sq.cm (approx. 27/sq.m.) according to European Pharmacopea and EN 14079.
- X-Ray detectable thread with approx. 60% barium sulphat contents.
- Products are counted and weight controlled to assure maximum efficiency of counting the exact number of products in the package, and packed in the inner package where a double control card is fixed. The inner pack is then packed in an outer peel-open pack and sterilized.
- Inner pack with double control tag + outer peel-open pack + shelf box + transport carton.

Sterile - Double pack - Control tag
