Gripper Micro™

Port Access Needle

Blunt Cannula, Safety Needle

- A safety port access needle to administer or withdraw fluids from implanted ports
- Available in different sizes and lengths
- Non-sharp, blunt cannula for safe removal and disposal
- Trocar, non-coring needle that locks into place for sharps disposal with an audible and visible click
- Tiny footprint with thick cushioned needle platform sits against the skin when in-situ
- Non-siliconized needle
- The 20 cm-long extension set is available with or without Y-site with luer-activated needleless injection site
- Extension set with color-coded clamp(s)
- Priming volume: 0.3 mL or 0.8 mL depending on the extension set with or without the Y-site versions
- The blunt cannula design contributes to faster flow rate
- Pressure-rated up to 45 psi
- Positive ANTT evaluation
