Acapella Choice

Vibratory PEP Therapy System

Fast And Effective

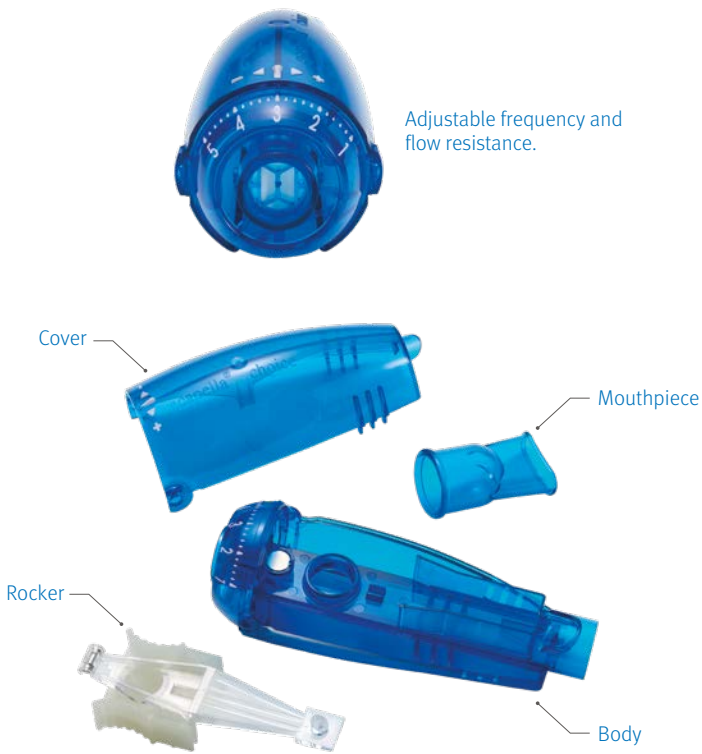

Acapella choice vibratory PEP therapy system combines the benefits of both PEP therapy and airway vibrations to mobilize pulmonary secretions. The therapy it provides is better tolerated than chest physiotherapy (CPT) and can be delivered in about half the time.¹

Easy To Clean

The acapella choice system can be disassembled for easy cleaning. It can be cleaned in the dishwasher (normal cycle) or with warm, soapy water. This can help the patient gain confidence when continuing to use acapella after discharge to help with recovery.

Easy To Use

The acapella choice system can be used anywhere and patients can perform the therapy independently, in any position.
