

Snuggle Warm™ Patient Warming Blankets

SWU-2001

SWU-2119

Product Description

The convective warming blankets consist of two layers of non-woven polypropylene fabric coated with a layer of polyethylene. The layers are bonded together to form a distribution network of air delivery channels. The warm air is distributed around the blanket through the delivery of channels and exits the blanket through a specially designed series of perforations in the patient side of the blanket. The distribution of air is designed to minimise temperature differences throughout the blanket.

Indications

The Snuggle Warm patient warming blanket is intended to prevent and treat hypothermia when temperature therapy is clinically indicated. The warming blanket can also be used to provide thermal comfort when conditions exist that may cause the patient to become too warm or too cold. The Snuggle Warm blanket can be used with adult or paediatric patients and is intended for use by appropriately trained healthcare professionals in clinical environments.

Contraindications

- › Thermal injury may occur if convective warming therapy is applied to lower extremities during aortic cross-clamping procedures.
- › Thermal injury may occur if convective warming therapy is applied to ischemic limbs.

Product Components

Blankets are made of non-woven material comprised of polyethylene and polypropylene blend with laminated card hose port.

Component Composition

Non-sterile blankets

- › Top and bottom material: Polypropylene and polyethylene
- › Hose card: Foldable solid bleached sulfate paperboard (C1S SBS) laminated with Biaxially oriented polypropylene
- › Not made with natural rubber latex
- › Not made with DEHP
- › Not made with BPA

Sterile blankets

- › Top and bottom material: Polypropylene and polyethylene
- › Hose card: Foldable solid bleached sulfate paperboard (C1S SBS) laminated with Biaxially oriented polypropylene
- › Hose: Self-extinguishing PVC
- › Not made with natural rubber latex
- › Not made with BPA

Legal Manufacturer Name and Address

Smiths Medical ASD, Inc.
6000 Nathan Lane North
Minneapolis, MN 55442 USA

Country of Origin

Mexico

Animal Origin

None

Sterilisation

SWU-2008 Sterile Cardiac Convective Warming Blanket:
Ethylene Oxide (EO)

Shelf-Life

A 3-year expiration date is assigned as long as the packaging is undamaged and unopened based on shelf life testing.

Labelling and Packaging

Product Codes: SWU-2001, SWU-2003, SWU-2004,
SWU-2009, SWU-2010, SWU-2011, SWU-2013, SWU-2016,
