

Versatus™-W

Product Information Card

Description:

A sterile, single use over-the-needle peripheral intravascular catheter with winged hub intended for accessing the peripheral vascular system.

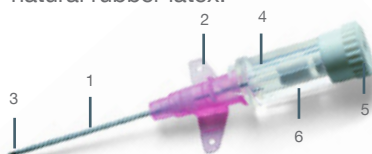

The Versatus™ - W catheter is made of three detachable parts:

- A radio-opaque catheter made of polyurethane connected to a transparent catheter hub fitted with small jointed wings. Catheter hub and wings are colour coded and refer to the EN ISO 10555-5 standard;
- An internal needle with a female luer base with a cone rising at an angle of 6%, transparent and colourless, allowing flashback to be seen, fitted with a removable filter that allows air to escape. The internal needle complies with ISO 9626 and EN 20594-1;
- An opaque, luer-lock cap.

The needle and the catheter are coated with medical grade silicone (European Pharmacopoeia).

The catheter and the needle are jointly covered by a protector. Does not contain components made of natural rubber latex.
