 SHARING EXPERTISE

Mandatory helmet – Mandatory seat belt – Mandatory safety

SAFE – SHARP

Aesculap® Safety Scalpels

- Reducing the risk of infections caused by cuts and stab wounds suffered during handover, take-over and disposal of scalpels.
- Safe locking for disposal.

One case is one too much!

On annual average in Germany, stab wounds and cuts from contaminated instruments infect:

400 hospital staffs	with Hepatitis B*
75 hospital staffs	with Hepatitis C*
1 hospital staff	with HIV*

*Source: EPINet

The danger of needlestick and sharp instrument injuries is frequently underestimated. Many health professionals think that small cuts or needlestick injuries are harmless and of no consequence, but they constitute serious hidden health risks for doctors and nurses in hospitals.
