PROLENE*

Monofilament Polypropylene

SUTURE

Description: **Monofilament** For smooth passage through tissue.
Synthetic For minimal tissue reaction.
Non-absorbable Provides permanent tensile strength retention in tissue.

Color: Blue or clear.

Range: 10-0 to 1 (USP). Supplied as needed sutures, armed with, for example, VISI-BLACK* needles, MULTIPASS* needles or CC-needles. Also available with pledgets.

PROLENE* sutures are also available as HEMO-SEAL*, with suture diameter to needle diameter ratio close to 1. HEMO-SEAL* is particularly useful in reducing needle hole leakage (for example in synthetic vascular grafts).

Indications: PROLENE* sutures are intended for use in general soft tissue approximation and/or ligation, including use in cardiovascular, ophthalmic and neurosurgical procedures. Typical areas of use include:

- Cardiovascular anastomoses
- Subcuticular sutures

Full details in the Instruction for Use included in every package.
