CUTICERIN[®]
Low Adherent Tulle Gras
Dressing

The impregnated gauze dressing
for superficial, exuding wounds

CUTICERIN[◇] impregnated gauze dressing for superficial, exuding wounds

The impregnated gauze, CUTICERIN is made of a smooth acetate¹ fabric with a defined mesh size² and water repellent³ ointment coating. This reduces the risk of granulation tissue growing through the dressing⁴.

Advantages

CUTICERIN is low adherent^{4,5} and may reduce pain on dressing change⁴. It is made from a smooth acetate fabric¹ with a defined mesh size² and water repellent³ ointment coating.

CUTICERIN minimises pain at dressing changes due to the reduced risk of granulation tissue growing through the dressing allowing the dressing to be easily removed⁴.

CUTICERIN is an impregnated gauze dressing which allows air and wound exudate to pass freely through the dressing⁶.

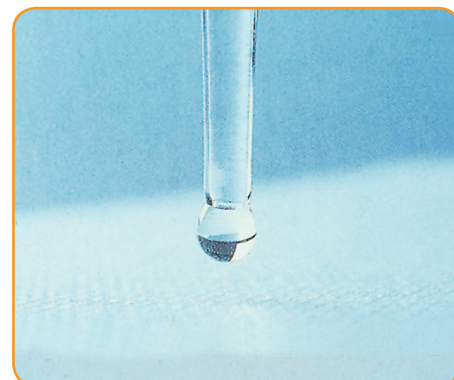

Presentation

CUTICERIN is sterile and individually sealed

Indications

For the management of superficial, exuding wounds, such as;

- Burns
- Abrasions
- Split-thickness skin graft donor sites
