Technical

Dimension

Dimension reference	Dimension text	Dimension value
А	Top piece length	21,5 cm
В	Top piece width	21,5 cm
С	Top piece circumference	65 cm
D	Side piece circumference with stretch elastic	54 cm
E	Side piece height	14,5 cm
F	Length of back piece	14 cm
G	Elastic length, relaxed	10 cm

Disposal instructions

Non-hazardous waste used BARRIER products and sterility barriers should, in the majority of cases, be classified as non-hazardous waste. They contain high amounts of energy and are well suited for incineration. BARRIER products do not contain any hazardous substances that can leach out if the products are land filled. Transport boxes are designed to fit existing recovery systems. The new BARRIER packaging system complies with the Packaging Waste Directive of the European Union.

Storage instructions

Mölnlycke Health Care recommends that BARRIER products are stored under normal storage conditions. All layers of packaging should be kept intact until access to the underlying layers is needed. Storage facilities for products only protected by the sterility barrier should be kept under conditions where low level of particulate air contamination prevail, so that it would not constitute a risk to the patient when the package is opened and the product is used.
