

General Purpose Needle Guides

Sterile Ultra-Pro II™ Disposable Needle Guides

The Ultra-Pro II needle guide now incorporates more flexibility and advanced features to increase productivity during ultrasound-guided procedures.

The needle guide directs instruments according to on-screen software guidelines.

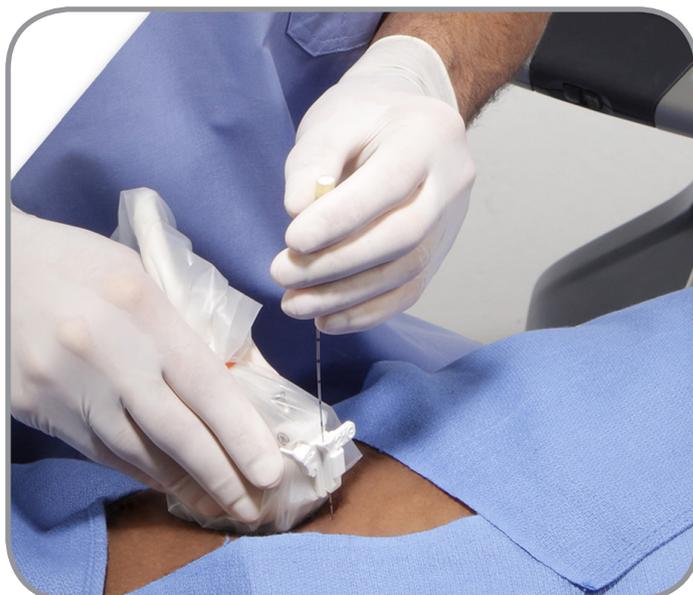

The Ultra-Pro II features a larger tab for improved quick-release function, allowing easy detachment of the needle from the transducer.

Easy-to-read gauge sizes on the inserts makes it simple to identify and alter gauge sizes in a darkened ultrasound suite.

The guide now features a larger funnel for instrument insertion and will accept a full range of sizes, including: 8.5FR, 14-23GA (19GA not available).

This guide is designed specifically for use with Ultra-Pro II™ or Ultra-Pro™ transducer brackets. Select kits offer covers with a three-dimensional “box end.”

All kits are conveniently packaged with sterile gel packet and colored elastic bands. U.S. Patent Nos. 5,941,889 and 6,361,499.

ULTRA-PRO II™

For inquiries regarding endocavity needle guides and Starter Kits please contact Mermaid Medical A/S at customer@mermaidmedical.com

Sterile Ultra-Pro II™ Disposable Needle Guides		
Ref. no.	Qty/box	Description
