

NEW Celox™ RAPID Gauze

- **Works with just 60 seconds compression¹**
- **The fastest acting Haemostatic Gauze treatment**
- **RAPID action reduces blood loss²**

Time is critical when treating severe injuries in the field and saving time increases the chance of survival for the casualty in an emergency or hostile situation. To be effective in real use, haemostats need to work fast.

The current generation of haemostatic agents need at least 3 minutes of compression to work. Celox RAPID Gauze removes the delay by speeding up packing time and reducing compression time to just 60 seconds while using the proven haemostatic technology of Celox.

Tried and Tested

Independent testing² on Celox RAPID has shown the product works on lethal injuries and significantly reduces blood loss compared to Quikclot Gauze*. As well as reducing treatment time and blood loss, a model of tactical evacuation showed that the Celox RAPID Gauze stayed in place during transport with no re-bleeding³.

Product and ordering detail

Celox Rapid, Haemostatic Z-Fold gauze. Product Code FG08839021.

NATO Stock Number: 6510-99-184-6453.

1: Testing a new gauze hemostat with reduced treatment time. A Hoggarth et al. Presented at ATACCC Symposium 2011, Fort Lauderdale, USA.

2: Chitosan-based advanced hemostatic dressing is associated with decreased blood loss in swine uncontrolled hemorrhage model. Kunio N et al. Am J Surg 2013.

3: Mechanism of action of rapid-action gauze hemostat. Hoggarth A et al. Presented at ATACCC Symposium 2011, Fort Lauderdale, USA.
